HARRISON THE CHOICE

Whitelaw Reid for Second Place.

Review of the Proceedings of the Minneapolis Convention.

The Vote: Harrison 535 1-8, Blaine 182 1-6, McKinley 182—Reid Nominated by Acclamation—Incidents of the Proceedings of the Four Days, Etc.

While in France deaths are in excess of births, in Italy the increase of population is rapid in spite of the ever increasing exodus.

Cheese making in Canada has enormously improved within recent years as a result of the method of instruction which has been promoted by the Government in sending competent instructors among the cheesemakers.

The odor of musk has been known to cause people with sensitive olfactory nerves to faint away, but it is most surprising to learn, observes Harper's Weekly, that the perfume of flowers can affect a singer's voice.

Every year a novel flower show is held in Philadelphia under the patronage of the Germantown Horticultural Society.

A report issued by the London Society for the Prevention of Cruelty to Children has caused a sensation by the statements it contains relative to the cruel and oft times inhuman punishments inflicted upon children.

The opening of the convention found the presidential contest still a problem to be solved, and the contest to be fought and the leaders of the two great factions had exhausted every resource of strategy and diplomacy, but all the toll and vigil and unceasing contest among the two had been unable to bring either man within less than 50 votes of the haven of his hope.

Mr. Fassett made a very graceful little speech of congratulatory nature to a figure in the convention. He made a record, however, that will stand by him well. President McKinley then began his speech. It was quiet and deliberate. In opening, he said:

Gentlemen of the Convention: I thank you for the honor of presiding over the sixth national convention of a political party. A Republican convention means something. They have always meant something. Republican conventions say what they mean and mean what they say. They declare principles and purposes, and when entrusted with power they execute and enforce them. [Cheers.]

The fraternal association of the two portraits, however, does not represent the feeling between the two candidates. The feeling of bitterness has been created in the last two days.

The delegates are now in coming in. At 11 o'clock about a third of them were in their seats. Gov. McKinley, who was to be the peroration of the day, was hidden away in the rear row of the national convention hall. He was the only one of his party who had not yet taken his seat.

Now let us all take hold and help and we shall have a more successful celebration than ever.

"Children's Day" June 12, was observed at the M. E. Church by giving the whole day to the children. There was a large audience of little ones in the morning service, and the concert at the evening service was a success. The youthful singers and speakers not only won much credit for themselves but also for those who had immediate care of the exercises. Flowers were in abundance and were tastefully arranged. A collection was taken in the evening for the Children's Educational Fund.

WEST CHARLESTON.

June 14.—The annual Conference of the Congregational Church of West Charleston was held at 10 a. m. Tuesday the Conference opened with a prayer meeting led by Rev. W. A. Busher of Derby Centre. The Divine Aid sought and obtained at the prayer meeting was manifested through the Conference session. The financial report of the pastor, D. M. Camp and Judge Austin. A discussion on the "Social work of the Church" was then opened by Rev. J. K. Fuller of Barton Landing. Some of the suggestions thrown out by this gentleman aroused all the old time "Patrons." Those who listened to the discussion must surely have arrived at the conclusion that the Congregational ministers of this part of Vermont were not in a backward state of religious experience. Their unwritten discipline needed no revision on the amusement question. Dancing and card playing were very emphatically prohibited. The other conspicuous features of the Conference were the "Conference Sermon" by Rev. Lincoln Harlow of Coventry, and an Address by Miss Hartig, a lady missionary from Moody's Training School. The "Conference Sermon" was an able, clear, full of instruction. It was delivered in the spirit and with power. Miss Hartig won completely the hearts of the people by her loving spirit and pathetic eloquence. The time spent at the Conference was a time of refreshing from the presence of the Lord, and right royally did the good people of West Charleston attend to the great God who giveth seed to the sower and bread to the eater, who giveth the stars in their courses and ruleth the destinies of men, who are working for the salvation of men and the triumph of righteousness in the earth.

THE LUMBERMEN AND THE FOREST.

To The Editor of the Herald:

The sailor who beat the Jew for crucifying Christ showed a profound knowledge of biblical history as do some journalists when they undertake to discuss present forest conditions. The Boston Journal thinks the lumbermen should be restricted by state legislation to the best of their kind. Not one lumberman here would make our forests grow, increase our water powers and build homes for all.

Mr. Julian Ralph in the April Harper's Magazine says "the lumbermen have pursued a policy and method that make them the chief criminals of the century." Mr. Francis Chapman in his "Half-Century of Condit" says:

"For untold ages Maine had been one sea, broken forest, and it was so still. The lumbermen had cut down the forest vegetation survivors in some parts to this day, with the same prodigality of violence, the same disregard for existence, and must have had that mark all organized beings, from men to mushrooms. Young seedlings in many a forest were trampled to death. They were torn, as they grew, interlock their boughs and repeat in a season or two the same scene of mutual destruction. Not one infant of least sapling, dead or dying with faintly stretching towards the light. Not one infant of the survivors form an insuperable host, pressed together in a mass of normal development, as men are said to be in the level savannas of the tropics."

Here we have a vigorous description of forest conditions—conditions that are well known to lumbermen today. Our forests have disappeared before the advancement and growth of the country. The Boston Journal is right in saying that state legislatures should protect the forests. But how? Our state books legislation; and until this class of law-making is perfected our forests are in danger of local extinction. When prohibition prohibits, and men stop "going fishing" forest fires will be rare.

The late Col. Clark of the Manchester Mirror spent one summer in investigating forests. At the end of his investigation he gave the result in the Mirror, and said that in all the places he had been where lumbermen had operated he was unable to tell where they had cut and where they had not. He was so impressed by the vandals acts of irresponsible parties, and cited one case where a maker of canes and White Mountain Tourist sticks was in the habit of burning over large tracts of timber land in order to better select the material for his business.

The writer has been through Vermont woods and seen tree after tree that had been cut down only for the gum to be got from the seams. Probably the worst case of forest destruction, and one that draws entirely from our future supply, is the cutting of sapling pine, spruce, and hemlock, for city loads of these saplings, and hundreds of cords loads of these saplings. Rings are annually shipped to our largest cities. Sentiment would make it hard to deny the residents of these cities their accustomed Christmas greens, but we may hope that none of them ever find their way into the houses of editors and forest cranks.

That the lumbermen could be held in check where necessary by regulating the size of tree they shall cut, is probably true, but it brings in vogue a class of legislation that has always been vigorously fought in this country.

It has been suggested that forest lands be exempted from taxation. Would this preserve them?

Why does the Boston Herald want free lumber, and can it name a country that admits it free of duty? With three of the largest water-ways in New England, drawing their head waters largely from Canada, how would free lumber be of material advantage to our water-power preserve them?

If Mr. Ralph is right, the retort is fair that sportsmen have burned enough timber to build houses for every houseless person in America.

When the widow's cruse of oil is proved a myth, and the Malthusian theory becomes a condition, then our forests will be cut down. But until then it is right to ask that the honest industry of lumber manufacture be left in peace and legislative action be directed against vandalism.
